INDEX

Abderhalden, E.: Innervation and its relation to internal secretion 318
— Pathology and treatment of diabetes 852
— (Gellhorn): Action of organ extracts 539
— (Schiffman): Action of thyroid and iodine preparations on tadpoles 918
— — Substances with specific action prepared from single organ 918
— (Schiffmann, Olga): Optones from endocrine organs.....867
Abel, G.: The use of migraine-serum (Bohnstedt) in gynecology 321
Abelin, J.: Vegetative nervous system and metabolism; proteinogenous amines 659
Acetone in diabetes.....854
Acetonuria and glycemia after injection of adrenin in dysentery.661
— of diabetes 857
Achard, C. (Binet and Cournand): Variations in the blood sugar after intravenous injection of novarsenobenzol.....852
— (Rouillard): Hypophyseal syndrome 547
Achondroplasia, case of.....275
Acidosis, determination of, in diabetes 293
— diabetic and edema.....676
— in diabetes.....135
Acne, results of testicular implantation in 791
Acromegaly and pituitary disorders 899
— — tumors of the hypophysis..896
— case of.....312, 525
— — — improved by radiation..525
— — — treatment of, with hypophysis extract.....901
— clinical study of a case of....707
— cured by radium.....439
— diabetes insipidus in.....415
— effect of hypophysis extract in.893
— endocrine involvement in....440
Acromegaly from late hereditary lues 550
— gigantism 152
— incipient, in infancy.....444
— interstitial cells in.....695
— laryngeal cartilage changes in.161
— pancreas hyperplasia in.....720
— pathogenesis of.....715
— radiotherapy in.....889
— relation of, to diabetes.....552
— rôle of hypophysis in.....890
— syndrome of, with pituitary tumor, cured by x-rays.....894
Adams, R. D.: Nocturnal paroxysmal dyspnea: its treatment with thyroid gland.....918
Addison's disease.....662
— — and developmental disturbances of the adrenal....661
— — blood sugar in, and the influence of adrenin.....847
— — case of, pathology and histology of.....126
— — etiology and treatment of..532
— — pathogenesis of 525
— — pigment formation in.....120
— — successfully treated with tuberculin 129
— — tuberculosis of adrenal in; atrophy of pancreas in..125
— — tumor of the fourth ventricle of the brain, accompanied by cutaneous pigmentation like 850
— — with pluriglandular insufficiency 662
— syndrome in incomplete Recklinghausen's disease 535
Adels, M. H. J.: Treatment of sciatica 659
Adenoids, relation of, to endocrine-autonomic system.....275
Adenoma, hyperthyreotoxic, and exophthalmic goiter as independent diseases 726
Adipose gland, morphology and function 760
— tissue, influence of the nervous system on 871

Adrenin, action of on the blood picture in leukemias.....840
——————leucocytes and erythrocytes ..838
——————vessels, studied with the capillary microscope.666
—————uterus 420
——on hypercalcemia 282
————muscular excitability and fatigue 666
————the kidney of minute doses of adrenalin and pituitrin on the kidney 533
—————uterus 535
—administration of in dystrophia adiposogenitalis...899
—————uncontrollable vomiting; relation of, to acidosis 847
—analgesic action of, in ophthalmic neuralgia 661
—and blood picture.....415
——caffein, antagonistic action of, on the isolated intestine 839
——hyperglycemia 276
——papaverine, simultaneous effects of, in the human organism 838
—— pigment formation in Addison's disease 120
——pilocarpin on sugar metabolism 423
——respiratory quotient 415
——strophanthin in acute cardia paralysis 124
——the secretion of sweat....529
—anemia, influence of, on progress of experimental tuberculous infection.....530
—antagonistic action between, and atropine 416
————of, and caffein.....526
—————organ extracts on...283
——to tonsil extract.....590
—atropin and pilocarpin, action of 845
—augmentation of tuberculin reaction, by addition of....276
—blood acetone 280
——pressure after the injection of, in hypertonia.....842
————and pulse reactions to, in sick children.....527
——sugar in Addison's disease and the influence of....847
—calcium as an antagonist of..127
—calorigenic effect of, in dogs..526
—cardiovascular action of.....668
Adrenin, changes in the H-ion concentration after injection of 667
—chemistry of (test for).....668
—Cheyne-Stokes respiration produced by 534
—conduction of, along nerves..421
—depressor effects of, and conditions modifying 402
—diaphoretic action of.....529
—disturbed formation of, in the adrenals due to external causes, and its biological significance 667
—effect of administration of on adrenals 838
————compared with pituitary extract 900
————injection of, in hypertonia 841
————intra-arterial injection..279
————extracts of, on amyl nitrite spasms 662
————on blood.....123
—————calcium 660
—————sugar 693
—————calcium of serum...689
—————endocrine organs and blood 146
—————heart 281
—————healthy persons 660
—————muscle tonus 662
—————respiration 284
——on eosinophils 467
—energometric studies on the influence of, on the circulation 664
—estimation of, colorimetric method for 119
————quantities of 671
—experimental study of clinical application of 534
—extract, action of, on uterus..867
—gas metabolism and.....659
—glycosuria, action of ovary on.558
—histochemistry of, and melanin 842
—hyperglycemia 121
——in man 671
——influence of parasympathetic nerve toxins on...543
—hypersensitiveness and hyperthyroidism 128
—in asthma 126
——cardiac arrest 281
————paralysis of narcotic origin 123
——cholera 127
——nephropathies 842
——osteopathies 334

Adrenin in perfusion experiments on the kidney.....532
——— pneumonia 128
——— treatment of urticaria.....125
——— urine of pregnant and puerperal women 284
— influence of, in diabetes.....671
——————— different concentrations on blood sugar and blood pressure 850
——————— man 839
——————— the study of the involuntary nervous system 846
——————— injections of on the endocrine organs 873
——————— on automatic movements of iris 661
——————— blood cells 124
——————————— sugar 532
——————— glycogen content of muscle of phlorizinized animals..283
——————— growth 275
——————— heart rate 664
——————— isolated muscle.....531
——————— latent malaria.....419
——————— pancreas 453
——————— the excretion of uric acid 665
——————— the ocular pressure, and on the blood pressure, general and retinal.....843
——————— the permeability of the sarcolemma...666
——————————— voluntary muscle...126
——— on blood sugar after exposure to light rays....845
— injection of, in lunatics.....849
— injections had no effect on antibody formation 278
— intracardiac, in cardiac arrest.275
— intracardial injection of, in an infant 661
— is it a hormone?.....843
— lesions of the vessel-walls caused by 846
— leucocytosis 416
— lymphocytosis as test of splenic function.....278
— mechanism of hyperglycemia after injection of.....841
— mode of action of, against bacterial toxins 285
— modification of urinary nitrogen after injections of.....276
— on blood-sugar 282
——— gastro-intestinal tract 275
— pharmacodynamic study of...280
Adrenin, preparation of.....128
— preparations, plea for control of 131
— pressor effects of, and conditions modifying 402
— products, technical points in the method of physiological control of 847
— quantity of in suprarenals as determined by chemical and physiological methods.....533
— reaction, factors which modify 402
——— to, after x-ray treatment of the thyroid 951
——————— in hypertension 127
— red cell concentration after...126
— relation between the changes in the H-ion concentration in the vena porta and the hyperglycemia after administration of 664
——— of pancreas to.....327
——————— to hypertonia 417
——————————— muscular activity; to work activity 511
——————————— radio-activity 131
——————————— tyrosin 418
— respiratory function of; relation of to basal metabolism.197
— response of diseased bronchi to 419
——————— the isolated oesophagus of the frog and turtle to 660
— seat of vaso-constrictor action of 281
— secretion; Gley's experiment controverted 419
— sensitiveness of the thyroid to, and exposure to x-rays.....743
——— to 122
— solutions, requisites for satisfactory 124
——— sterilized and unsterilized activity of 850
— sugar content of tissue fluids and blood 279
— test for hyperthyroidism.728, 932
——————— thyroid disorders.....124
— tests 851
— the action of, on the skin glands of the toad.....672
——— influence of, on the volume of the perfused kidney..532
— theory of formation of.....418
— treatment of rickets.....282
——————— sciatica with 659
——————— tabetic crises 848
— use of, in vomiting and ptyalism of pregnancy 839

Adrenin, uselessness of, in diabetes insipidus.....230
— vasoconstrictor action of.....667
— vs. cholin, action of, injected in blood of chickens.....542
Adrenofer, therapeutic value of.527
Age in relation to incretory organs 755
Ajévoli, E.: Influence of local application of testicle substance on cicatrization 566
Akagi, Y.: Nerves in human ovary 322
Alajouanine: See Foix.....865
— See Souques 866
Albeck, V.: Relation between emesis and size of thyroid, and demonstration of a strange modification of the thyroid in sows with young.....571
— Treatment of emesis with thyroidine 571
Albertario: Case of dystrophia adiposogenitalis 547
Alexandrescu-Dersca, C.: See Urechia 428
Alkalosis and tetany.....458
Allara, V.: The cause of cretinism 572
